

Amendments To Claims

1. (Currently Amended) A human test, comprising ~~the steps of:~~
~~—generating a web form that enables creation of a user~~
~~account for a computer-related service such that the web form~~
~~poses posing~~ a question that is selected to exercise a human
~~conceptual common sense reasoning capability of a human being,~~
~~—obtaining an answer to the question and comparing the~~
~~answer to a correct answer that would be rendered by the human~~
being.

2. (Currently Amended) The human test of claim 1, ~~wherein the~~
~~step of posing a question comprises the step of posing wherein~~
~~generating a web form comprises generating a web form that~~
~~poses~~ a question that is selected to exercise an image
recognition capability of the human being.

3. (Currently Amended) The human test of claim 1, ~~wherein the~~
~~step of posing a question comprises the step of posing wherein~~
~~generating a web form comprises generating a web form that~~
~~poses~~ a question that is selected to exercise a capability of
the human being to recognize spoken speech.

4. (Currently Amended) The human test of claim 1, ~~wherein the~~
~~step of posing a question comprises the step of posing wherein~~
~~generating a web form comprises generating a web form that~~
~~poses~~ a question that is selected to exercise a natural
language processing capability of the human being.

5. (Cancelled) The human test of claim 1, wherein the step of
posing a question comprises the step of posing a question that

is selected to exercise a common sense reasoning capability.

6. (Currently Amended) The human test of claim 1, ~~wherein the step of posing a question comprises the step of posing wherein~~ generating a web form comprises generating a web form that poses a question that is selected to exercise any combination of image recognition and spoken speech recognition and natural language processing and common sense reasoning capabilities of the human being.

7. (Currently Amended) The human test of claim 1, ~~wherein the step of posing a question comprises the step of posing wherein~~ generating a web form comprises generating a web form that poses a question using speech communication.

8. (Currently Amended) The human test of claim 1, ~~wherein the step of posing a question comprises the step of posing wherein~~ generating a web form comprises generating a web form that poses a question using visual communication.

9. (Currently Amended) The human test of claim 1, ~~wherein the step of posing a question comprises the step of posing wherein~~ generating a web form comprises generating a web form that poses a question using a communication that is adapted to a human having an impairment.

10. (Currently Amended) The human test of claim 1, wherein the ~~step of posing a question~~ generating a web form comprises the ~~steps of:~~

generating a stimulus that is perceptible by one or more human senses;

posing a question pertaining to the stimulus that is selected to exercise the ~~human conceptual~~ common sense reasoning capability.

11. (Currently Amended) The human test of claim 10, wherein ~~the step of~~ generating a stimulus comprises ~~the step of~~ generating an image.

12. (Currently Amended) The human test of claim 10, wherein ~~the step of~~ generating a stimulus comprises ~~the step of~~ generating a speech communication.

13. (Currently Amended) The human test of claim 10, wherein ~~the step of~~ generating a stimulus comprises ~~the step of~~ generating a sound.

14. (Currently Amended) The human test of claim 1, further comprising ~~the step of~~ measuring a time taken by a subject of the human test to provide ~~the~~ an answer to the question.

15. (Currently Amended) A computer-readable storage media that holds a set of code that when executed provides a human test by generating a web form that enables creation of a user account for a computer-related service such that the web form poses a question that is selected to exercise a common sense reasoning capability of a human being ~~a set of information for performing a human test by posing a question that is selected to exercise a human conceptual capability~~.

16. (Currently Amended) The computer-readable storage media of claim 15, ~~wherein the information includes~~ further comprising a

set of possible questions from which the question may be selected.

17. (Currently Amended) The computer-readable storage media of claim 15, ~~wherein the information includes~~ further comprising an image that poses the question.

18. (Currently Amended) The computer-readable storage media of claim 15, ~~wherein the information includes~~ further comprising a sound that poses the question.

19. (Currently Amended) The computer-readable storage media of claim 15, ~~wherein the information includes~~ further comprising an image to which the question pertains.

20. (Currently Amended) The computer-readable storage media of claim 15, ~~wherein the information includes~~ further comprising a sound to which the question pertains.
